

Relaxed with VR 通过VR实现解压

上海缔矢口腔门诊部DDS齿科 今天

Relaxed with VR

You have that certain queasy feeling when you need to see a dentist?

You're not alone in this.

Wouldn't your appointment be better and easier if it happened after you have calmed down in a relaxing atmosphere?

你是否一想到要去看牙就恶心眩晕？

不用担心，你不是一个人在战斗。

According to www.statisticstats.com, dental fear affects over 75% of adults to some degree. Of those, up to 10% experience a fear so profound that it is classified as "dental phobia". This fear often is related to negative experiences in the past when visiting a dentist. Reasons can be pain, the feeling of helplessness, embarrassment, or even a downright

needle phobia. Sometimes only the smells and the sounds are enough to trigger the memory and to provoke anxiety or panic attacks.

根据www.statisticstats.com调研，超过75%的成年人都多多少少有着相同的困扰，其中约10%的患者因以往不愉快的看牙经验而深受“牙医恐惧症”的折磨。疼痛，无助，羞愧，对针头的恐惧，亦或者是仅仅的气味和声响，都能激起记忆深处的无尽焦虑。

As a result, not only these patients' dental health suffers as they avoid seeing a dentist for long years, but in the following also their overall health can deteriorate.

然而，因此而受影响的可不仅仅是单纯的牙齿健康，长期逃避看牙会造成口腔内部整体卫生标准的下降。

We at DDS Dental Care take such preconditions very seriously and that is why we are starting to break new ground and implement VR into our daily practice.

The German brand "Magic Horizons" has specialized in VR experiences to calm patients before or during treatments. "Magic Horizons" offer a headset ready for use in dental practices as a "all in one" solution.

DDS Dental Care非常重视由此心理现象带来的潜在问题，并致力于帮助广大患者们克服对日常看牙造成的不适及恐惧感：我们很高兴将在不久的日常看诊中与大家分享德国品牌Magic Horizons的VR（虚拟现实）技术产品。VR头上戴，躺椅背后靠，为大家带来“看牙放松两不误”的一条龙服务。

Patients with anxiety can immerse into natural worlds, dive with dolphins, enjoy sandy be-

aches or lush, green landscapes while sitting in the treatment room.

VR将带领大家进入美丽的大自然，与海豚嬉戏遨游，享受活力四射的沙滩.....

When in the treatment chair patients can plug in their earphones to calm down with binaural audio and mystique landscapes while the injection is set and they need to wait for the sedation.

配套的双声道耳机中传来具有神奇镇定魔力的音乐，带你穿梭于虚拟世界中的壮丽奇景。
